SUMMARY

Senior Software Engineer with 15+ years of experience designing, developing, and modernizing enterprise applications across financial services, energy, and technology. Primary focus on enterprise Java, Spring Boot, distributed systems, and microservices, with Python as a supporting language. Experience with AWS, Terraform, Docker, Kubernetes, CI/CD, production application support, and MCP tools and API endpoints for AI agents.

TECHNICAL SKILLS

Enterprise & backend: Java, Spring, Spring Boot, Hibernate, J2EE, REST APIs, SOAP, distributed systems.
Supporting language: Python.
Web & data: React, JavaScript, TypeScript, Next.js, JSF, HTML/CSS, SQL, Oracle, Liquibase.
Cloud & delivery: AWS, Terraform, Docker, Kubernetes, Jenkins, Hudson, Maven, Gradle, CI/CD, MCP.

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. May 2026 – Present
Software Engineer | Columbus, OH

- Modernized credit card fraud detection using Java and Python, replacing batch processing with real-time microservices to enable faster transaction evaluation and fraud decisions.
- Developed scalable REST APIs and high-performance data aggregation services for real-time transaction monitoring.
- Encapsulated IBM's DSAR rules engine in a microservice to reduce support load when the engine is updated.
- Worked with Terraform and AWS for infrastructure automation and deployment, supporting containerized services with Docker and Kubernetes.

Wells Fargo & Company Nov 2025 – May 2026
Software Engineer | Columbus, OH

- Built an extensive set of Model Context Protocol (MCP) tools and API endpoints for AI agents to use in enterprise access management workflows.
- Engineered enterprise access management solutions using Java, Spring Boot, Python, and REST APIs, automating onboarding, access provisioning, and application lifecycle workflows.

American Electric Power Nov 2018 – Sep 2025
Senior Java Developer | Columbus, OH

- Led refactoring of a 200K+ line Java codebase using Spring Boot and Hibernate, improving maintainability, architecture, and code standardization.
- Developed enterprise applications using React, JavaScript, TypeScript, and Next.js, integrating responsive frontend interfaces with Java REST APIs.
- Migrated legacy applications to Docker and Kubernetes, automating builds and deployments through Jenkins, Hudson, Maven, and Gradle.
- Remediated hundreds of security vulnerabilities, strengthened secure coding practices, and maintained production applications across WebLogic environments.

STEVE WOHLWEND

PROFESSIONAL EXPERIENCE — CONTINUED

Lexon Corporation Aug 2015 – Feb 2018
Java Developer | Dublin, OH

- Collaborated with a 12-person engineering team to modernize a flagship Java application, replacing legacy applets with JSF, JavaScript, and HTML/CSS web interfaces.
- Implemented Liquibase for Oracle database schema versioning and integrated barcode-scanning hardware with VB.NET applications to improve operational workflows.

McGraw-Hill Education Feb 2014 – Aug 2015
Java Developer | Columbus, OH

- Developed and maintained enterprise applications using Java, Spring, JavaScript, HTML/CSS, and SQL, delivering frontend enhancements and backend functionality for education systems.
- Improved application reliability through performance monitoring, structured logging, server diagnostics, and production incident resolution.

Fiserv, Inc. Apr 2010 – Feb 2014
Java Application Specialist | Dublin, OH

- Supported enterprise applications using Java, J2EE, JavaScript, HTML/CSS, and SOAP, maintaining web interfaces, backend integrations, and application configurations.
- Managed CI/CD, production deployments, security certificates, disaster recovery, and enterprise application support across multiple environments.

EDUCATION

The Ohio State University 2005 – 2009
B.S. Computer Science and Engineering
