STEVE WOHLWEND

Senior Software Engineer

steve.wohlwend.work@gmail.com (740) 816-1333 Columbus, OH steve-wohlwend-54292715

Summary

Senior Full-Stack Software Engineer with 15+ years of experience designing, developing, and modernizing enterprise applications across financial services, energy, and technology. Expertise in **Java**, **Python**, **Spring Boot**, **FastAPI**, **React**, **TypeScript**, **Next.js**, and distributed systems. Strong background in **AWS**, **Terraform**, **Docker**, **Kubernetes**, and **CI/CD**, with proven success modernizing large-scale applications, developing microservices, and delivering cloud-native solutions.

Professional Experience

Software Engineer, *JPMorgan Chase & Co.* May 2026 – Present | Columbus, OH

- Modernized credit card fraud detection using **Python**, **FastAPI**, and **Java**, replacing batch processing with **real-time microservices** to enable faster transaction evaluation and fraud decisions.
- Developed scalable **REST APIs** and high-performance data aggregation services, integrating **React**, **TypeScript**, and **Next.js** interfaces for real-time transaction monitoring.
- Extracted fraud detection rules into independently deployable **Java microservices**, supporting containerized deployment with **Docker**, **Kubernetes**, and **AWS** to improve scalability and maintainability.

Software Engineer, *Wells Fargo & Company* 11/2025 – 05/2026 | Columbus, OH

- Engineered enterprise access management solutions using **Python**, **Java**, **Spring Boot**, and **REST APIs**, automating onboarding, access provisioning, and application lifecycle workflows.
- Developed responsive **React** and **TypeScript** interfaces integrated with backend APIs to streamline access requests and administrative operations.
- Built **Model Context Protocol (MCP)** integrations enabling **AI agents** to automate onboarding workflows; incorporated **Terraform** and **AWS** into infrastructure automation and deployment processes.

Senior Java Developer, *American Electric Power* 11/2018 – 09/2025 | Columbus, OH

- Led refactoring of a **200K+ line Java codebase** using **Spring Boot** and **Hibernate**, improving maintainability, architecture, and code standardization.
- Developed enterprise applications using **React**, **JavaScript**, **TypeScript**, and **Next.js**, integrating responsive frontend interfaces with **Java REST APIs**.
- Migrated legacy applications to **Docker** and **Kubernetes**, automating builds and deployments through **Jenkins**, **Hudson**, **Maven**, and **Gradle**.
- Remediated hundreds of security vulnerabilities, strengthened secure coding practices, and maintained production applications across **WebLogic** environments.

Java Developer, *Lexon Corporation* 08/2015 – 02/2018 | Dublin, OH

- Collaborated with a 12-person engineering team to modernize a flagship **Java** application, replacing legacy applets with **JSF**, **JavaScript**, and **HTML/CSS** web interfaces.
- Implemented **Liquibase** for **Oracle** database schema versioning and integrated barcode-scanning hardware with **VB.NET** applications to improve operational workflows.

Java Developer, *McGraw-Hill Education* 02/2014 – 08/2015 | Columbus, OH

- Developed and maintained enterprise applications using **Java**, **Spring**, **JavaScript**, **HTML/CSS**, and **SQL**, delivering frontend enhancements and backend functionality for education systems.
- Improved application reliability through **performance monitoring**, structured logging, server diagnostics, and production incident resolution.

Java Application Specialist, *Fiserv, Inc.* 04/2010 – 02/2014 | Dublin, OH

- Supported enterprise applications using **Java**, **J2EE**, **JavaScript**, **HTML/CSS**, and **SOAP**, maintaining web interfaces, backend integrations, and application configurations.
- Managed **CI/CD**, production deployments, security certificates, disaster recovery, and enterprise application support across multiple environments.

Education

B.S. Computer Science and Engineering, *The Ohio State University* 2005 – 2009
